## Take control of your timberlands planning and harvesting with ForestLink

With the current economic conditions it is more critical than ever for your business to maximize every opportunity to increase profit margins.

The challenges of managing your operations are overwhelming. When combined with numerous cumbersome spreadsheets and multiple users it becomes nearly unmanageable. The end result is not buying, selling or operating at optimum efficiency.

You need to be more flexible to react more readily and address all the complexities of the timber industry.

ForestLink is your answer. Addressing the needs of TIMOs, REITs and any company with responsibility for managing extensive timberlands or delivery requirements.

ForestLink gives you the ability to control the intricate details of source cruise, harvest, production and delivery all in one user-friendly system. With a focus on empowering your users to better manage cost and revenue opportunities.

See our features list for more details on how ForestLink can address your business needs.

### Features

- Forecasting accuracy short-term with capability to manage a calendar up to 24 months
- Re-plan or make changes as needed to accommodate delays resulting from crews, weather or equipment
- Compare actual to forecast
- Automatically capture information on actuals from LIMS and continue with a rolling forecast
- Conduct “what-if” scenarios to assure maximum profit potential
- Multi-user planning development and management
- Manage multiple products in one block or source
- Reduce costs associated with procurement and harvesting of fee, non-fee and outside purchases
- Consistently deliver the target mix of raw material that maximizes value from the manufacturing facilities
- Develop a marketing plan indicating the volumes, sizes and timing of raw material surplus
- User-configurable interface to accommodate unique business requirements
- Extended reporting including SFI and FSC compliance
- Data incorporated into one system to increase accuracy and alleviate the need for cumbersome spreadsheets that are difficult to maintain

## Benefits

The screenshot shows the FORESTlink software interface. On the left, there is a 'Pick Plan' tab with sub-tabs for 'Harvest Plan' and 'Distribution'. Below this, a table lists sources with columns for 'Source' and 'Name':

Source	Name
00586	South Branch
00632	Lorne Resources
00905	West River Station

At the bottom left, another table lists crews:

Crew ID	Name
NPH001	Company Crew 001
NPH002	Company Crew 002

The main area displays a 'Crew ID' dropdown set to 'NPH001' and a large table with columns: 'Crew/Source', 'External', 'Plan', and a grid of 'D' and 'Vol' for weeks 2009-W28, 2009-W29, 2009-W30, and 2009-W31. The data rows are:

Crew ID	Source ID	External	Plan	2009-W28 D	2009-W28 Vol	2009-W29 D	2009-W29 Vol	2009-W30 D	2009-W30 Vol	2009-W31 D	2009-W31 Vol
NPH001	00632		7/6/2009	5	1000	5	1000				
NPH001	00905		7/20/2009					5	1000	5	1000
NPH001	00586		9/8/2009								
NPH001	00632		9/15/2009								
				5	1000	5	1000	5	1000	5	1000

**Planning made easy with greater accuracy and less effort!**

*Manage your timberlands and production with multiple users all in one system*

### Comprehensive

ForestLink in conjunction with LIMS and WeighWiz provide the most feature rich system in the marketplace today. Managing everything from silviculture through harvest to delivery - accurate and efficient.

### Strategic

Generate alternative planning scenarios and analyze to determine which opportunities provide the maximum benefit to your company. Better forecast cost and revenue to increase your profits.

### Flexible

Creating and editing plans is essential for managing your business. ForestLink allows you to change your plans and see the impact on your business instantaneously. ForestLink offers the flexibility to accommodate your requirements and can be modified as your business needs change.

### User-Friendly

Using a familiar Windows-based environment, ForestLink allows you to manage your information with ease. Robust reporting capabilities with an easy to use interface give you access to all your information.

### Cost Effective

Proper planning with ForestLink helps you optimize your timber plans so your company can achieve the highest return from your investments. ForestLink provides the results you need.

### Experience

3LOG is the leading provider of timber management products in North America. Let our professional staff help introduce industry best practices to your company. Contact us to learn more about how ForestLink can benefit you.
